

Preserve Planet Earth Committee, Rotary Districts 9500 & 9520
Living in a Drying, Warming and Bushfire Prone Environment

When Sunday 1 August 2010
Where Horace Lamb Lecture Theatre,
University of Adelaide
Times 10:00am to 4:00pm

Speakers for Forum

Mr Darren Ray, Senior Meteorologist & Manager of Climate Services, S.A. Regional Office, Commonwealth Government Bureau of Meteorology.

The Bureau of Meteorology and CSIRO have international standing for their research in Meteorological and Climate Science. Climate Change is observable in Australia and the implications for South-Eastern Australia will be set out.

Mr Elliot Dwyer Program Leader, Climate & Sustainability, Sustainable Systems Group, Primary Industries & Resources SA

Sustainable agriculture, its significance to climate change and the challenges and opportunities for primary producers in climate change

Professor Michael Taylor, Director, 'Institute for Sustainable Systems & Technologies', University of South Australia

Climate change, demographic change, and 'peak oil' will all have profound and interrelated impacts on our future travel and transport systems. These impacts will affect both normal life and exceptional circumstances (including how we plan to cope with natural disasters such as floods and bushfires).

Ms Wendy Bell, Bell Planning Associates. Member, Natural Resources Management Council & Planning Institute, Australia,

The Planning system has a role in responding to climate change. This involves climate change mitigation measures achieved through the planning process as well as adaptation processes and policies that are currently or potentially part of the planning system. The focus will be on urban land use planning, with some reference to rural land use planning'

Mr Gary Warden, Executive Director, Days of Change, W.A.

"Days of Change" (www.daysofchange.org) is an innovative sustainability program that is helping to achieve change on an unprecedented scale. It takes a simple approach of connecting people to support each others change through its innovative social networking website. The program works by providing a forum in which people can make public commitments to reduce their footprint, and then supporting them in making the changes to fulfil their commitments.

Ticket Price \$10.00 or \$5.00 with Student ID

Ticket Purchase:

(a) Mail Order until Wednesday 21 July

Post ticket request with cheque and stamped self addressed envelope
